

Patented — Perfected — Protection

Extreme Shell-F Slide-On Cases

for Chromebooks and laptops

Built for busy classrooms, MAXCases patented slide-on top delivers above-and-beyond protection against damage to device screens – for outstanding overall protection that keeps things slim and lightweight for easy carrying and fit in charge carts.

Slide-on design benefits

- Equalizes pressure around the screen, adding rigidity to this delicate area for greater protection when students grab screen or drop an open device.
- Lightweight design with more continuous surface area dissipates the energy of a drop and prevents undue stress on the device hinges.
- Easy installation with a single downward motion.
- Patented IP keeps case from popping off during drops.

Additional design benefits

- Custom-fit design delivers easy-access to all ports and functions along with maximum edge protection.
- Soft thermoplastic polyurethane (TPU) bumpers provide a perfect hand grip and dissipate the energy of a drop.
- Crystal-clean Makrolon Polycarbonate is high heat resistant and will not yellow.
- Non-porous, easy to clean

Utility Patent

Design Patent

**Exclusive,
patented
design**

**Independently tested to
MIL-STD for 26 drops
from 4 feet**

**Lifetime limited
warranty**

Installation

1 Line up top, push down gently

2 Line up bottom, push back gently

3 Locate clips, push closed
